INFORMATION DISCLOSURE STATEMENT

Dear Sir:

In connection with the above-entitled matter, Applicants hereby attach U.S. Patent Office forms PTO-1449 and PTO-892, including copies of the references listed therein not already of record in the parent application. The present application is a Continuation under 37 CFR 1.53(b) of application Serial No. 09/814,644, wherein some of the references referred to in the enclosed U.S. Patent Office Forms PTO-1449 and PTO-892 have been previously submitted or cited. Accordingly, it is respectfully submitted that no copies of the previously cited references are believed necessary. However, some of the references were cited in a Japanese Office Action dated March 31, 2004, of the counterpart Japanese patent application. Enclosed is a copy of the Japanese Office Action, together with an English translation of the relevant portions thereof. The claims in the present application are believed to be patentably distinguished over these references.

This information disclosure statement is being made pursuant to the duty of disclosure imposed by law and formulated in 37 CFR 1.56(A). No representation is made that the

HAYES SOLOWAY P.C.

FAX. 603.668.8567

information thus disclosed in fact constitutes prior art or that it is the closest prior art, inasmuch as 37 CFR 1.56(A) relies on a materiality concept which depends on subjectivity.

In compliance with the requirements of 37 C.F.R. § 1.98(a)(3), as a concise statement of relevance, as it is presently understood by the individual designated in 35 U.S.C. § 1.56(c) most knowledgeable about the content of the information, the undersigned attorney of record submits a translation of portions of an official action by a foreign examiner in which the references were cited. The relevance to the pending U.S. patent application is that the references were cited in a foreign patent application on the same subject matter. However, no independent analysis of the references, the accuracy of the statement of foreign examiner or the claims of the foreign application under the laws of the country or the United States relative to the subject matter claimed in the present application has been made; the present understanding of the contents thereof by the undersigned being based on the translation of the foreign examiner's comments submitted therewith.

The enclosed Information Disclosure Statement is being submitted within three months of the Japanese Office Action, as certified in the attached Certification for Information Disclosure Statement. Therefore, we believe there are no fees involved with this Information Disclosure Statement. In the event there are any fee deficiencies or additional fees are payable, please charge them (or credit any overpayment) to our Deposit Account No. 08-1391.

Respectfully submitted,

Norman P. Soloway

TO THE COMMISSIONER FOR PATENTS:

This is a statement under the provisions of 37 CFR 1.97(e) in the above-identified application.

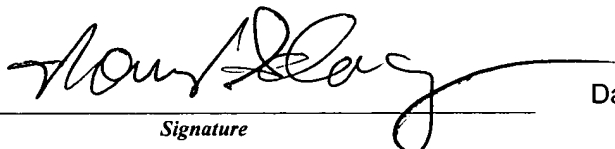

Check applicable statement herebelow:

Statement Under 37 CFR 1.97(e)(1)

- ☒ Each item of information contained in the accompanying Information Disclosure Statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the Information Disclosure Statement.

Statement Under 37 CFR 1.97(e)(2)

- ☐ No item of information contained in the accompanying Information Disclosure Statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the undersigned person, after making reasonable inquiry, no item of information contained in the accompanying Information Disclosure Statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the Information Disclosure Statement.

NEC 00P297

/1

...
[For Claims 1-8; Cited Documents 1-3]
(Remarks)

/2

<For Claims 1-2, 8; Cited Document 1>

A driving circuit of a plasma display panel that is described in Cited Document 1 has a relay device (a channel that contains coils L1, L2) with a 1st sustain drive circuit and a 2nd sustain drive circuit connected.

Further, a circuit constitution corresponding to a 1st switching element (SW4), 2nd switching element (SW3), 3rd switching element (SW11), 4th switching element (SW2), 5th switching element (SW1), 6th switching element (SW10), 1st coil (L2) and 2nd coil (L1) in a circuit constitution of the present application invention is also established. The polarity of potential is inverted for application of negative voltage for drive voltage by the cited invention but modification of the polarity of a drive voltage is without any technological significance.

<For Claims 3-7; Cited Documents 1-3>

Things like the point of establishing a diode for current reverse current prevention to a power source and the establishment of a diode circuit for a voltage clamp for a drive signal channel are conventional technology as disclosed in Cited Documents 2 and 3.
